Climate change is a universal threat. Ireland has declared a climate and biodiversity emergency. The inequality at the heart of climate change, means it's impact falls most heavily on those who have done the least to cause and with the least resources to mitigate its impact in particular women from communities experiencing poverty and marginalisation.

**What action is required?**

Policy work, cross sectoral collaboration, campaigns, communications and media work, joint initiatives and awareness raising amongst the women's sector including training and capacity building.

**Who should take the action?**

NWC staff in collaboration with members with a track record of work in this area as well as those interested in beginning to engage.

**In what time frame should the action be taken?**

This is a long term area of work which should begin immediately
